PACKER **PLUS**

› Reduction of errors:

Courier labels are automatically printed and affixed without manual intervention. There is no room for error here.

› Labour cost savings

Only one person is needed to operate the machine, which can pack 300 foil packs per hour.

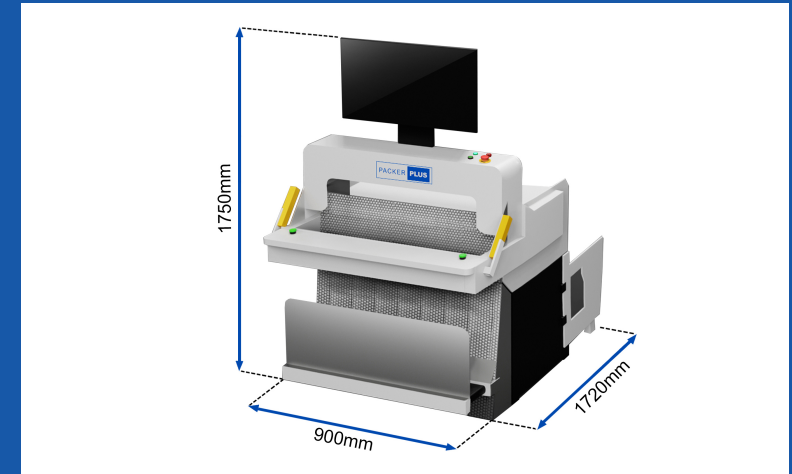

› High security

Factory-installed safeguards against crimping, burns and errors ensure completely safe operation (compliant with EU standards).

> Little space needed

The machine takes up as much as one manual working table and packs them 6 times faster.

> Highly versatile

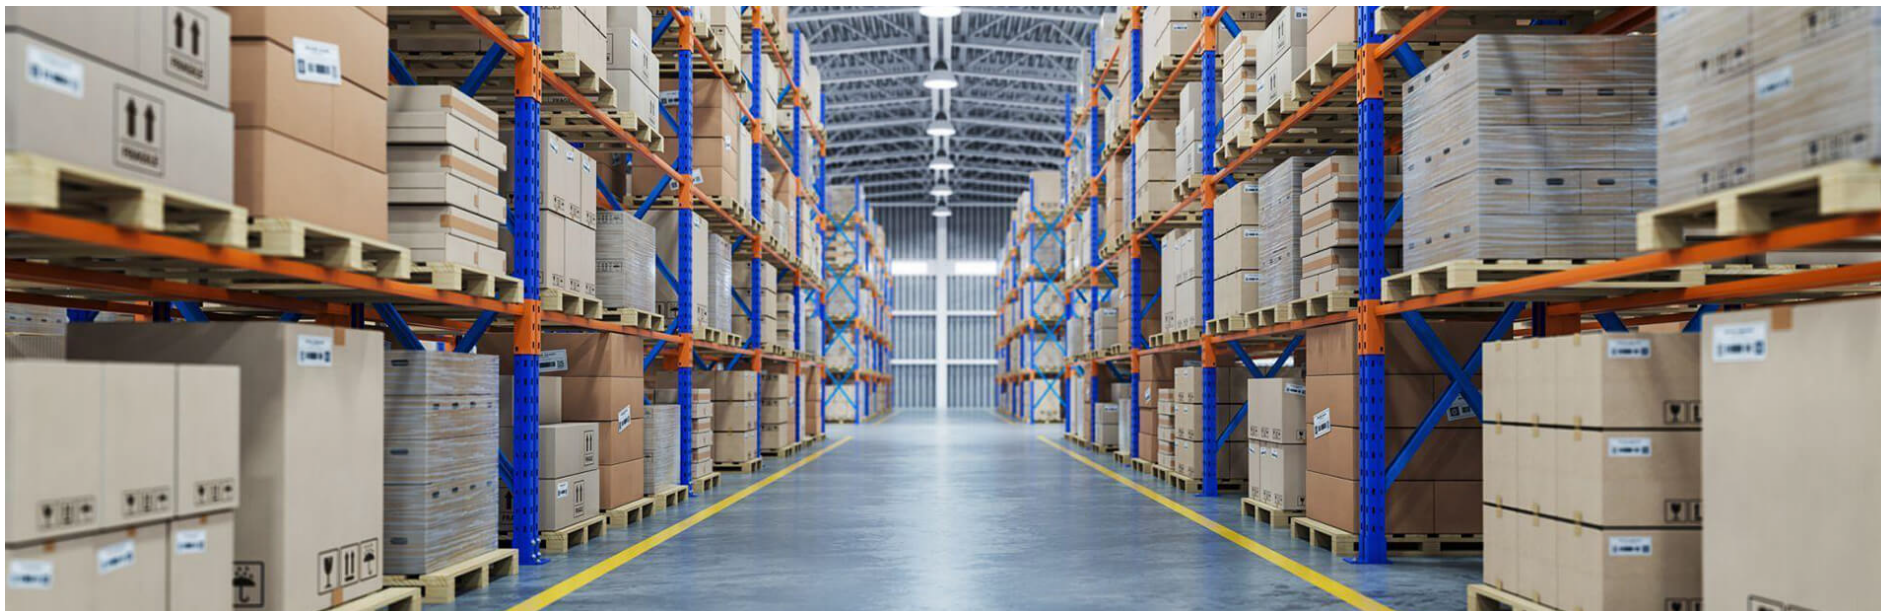

Seamless packing of single- and multi-product orders in a variety of sizes requires flexibility that has finally been fully automated.

PACKER **PLUS**

**The standard packing speed is 300
packages per hour,
7,200 packages per day**

**Yes, PACKER PLUS P200 can operate
24 hours a day.**

We are well aware of the needs and challenges facing e-commerce businesses. We have made it our goal to set new standards of efficiency utilising technology while keeping it available for companies.

Thanks to a combination of 15 years of experience in e-commerce logistics services and industrial automation, we can design and construct complete packaging solutions which maximise productivity, improve the attractiveness of packaging, reduce waste and increase the profitability of companies.

Our company boasts an experienced team of technical specialists and unique know-how. Precise quality controls guarantee the highest quality of work and long machine life. All of our products have the required certificates and declarations. Our employees provide comprehensive assistance at every stage: from project development, production and installation of your new machine, as well as a complete after-sales service.

All PACKER PLUS machines are covered by our manufacturer's guarantee.

It's time to innovate!
